

Project Quality Assurance Plan List

Quick help guide for testing the dynamic page manual system.

Mapped path: /project-quality-assurance-plan/list

Expected Help Button Behavior

When the user opens the PQA Plan list page and clicks **Help**, the application checks the current URL path and opens this manual in an in-page viewer.

? Help

+ New Request

- The user remains on the same screen.
- Table filters and unsaved page context are not disturbed.
- The file can also be opened in a new tab from the viewer.

Screen Areas

AREA	WHAT USERS DO	NOTES
Header	Open Help or create a new request	Primary test point
Tabs	Switch All, My, Pending, and Action requests	Permissions may hide All Requests.
Search Plans	Filter plans by project or user	Manual should not reset filters.
Table	View, edit, review, or delete plan records	Keep state

Test Checklist

- Login before opening this page.
- Go to /project-quality-assurance-plan/list.
- Click the **Help** button beside **New Request**.
- Confirm this PDF opens in the manual viewer.
- Close the viewer and confirm the list page remains unchanged.

Recommended Viewer

Recommended Use a Dialog for PDF or image manuals. It gives enough width for reading, supports the current modal viewer, and avoids compressing large documents into a narrow side panel.

Drawer fit Use a Fuse drawer for short contextual tips, field-level help, or a compact checklist. It is less suitable for full PDF manuals.
